

Inflatable Dock Size and Capacity Chart

Four docks, one build. Pick the size and the deck for your crew.

Every POP dock uses the same 8 in Air Ride drop-stitch core at 7 PSI, so it feels like a floor. What changes is the footprint, what is on top and how many people it carries.

Which dock for which day

- **The family swim dock:** AquaDock. Your own swim platform at the lake house, with a built-in net lounger.
- **Behind the boat:** Yacht Dock. A full floating deck. No net, all floor.
- **Fits in the trunk:** POPUP Dock. Our most portable deck, made for couples and small swim areas.
- **Sit in the lake, not on it:** AquaNet. A mesh lounge you sit in.

Count your crew

- Add up people, coolers, chairs and dogs, then leave room. A dock loaded to its limit sits lower.
- Bigger docks catch more wind and current, so plan your anchors to match.

Good to know

- **Setup:** unroll, pump to 7 PSI, carry it in and tie it off. The AquaDock takes 10 to 15 minutes with an electric pump, about 20 with the hand pump in the box.
- **Storage:** every POP dock rolls up small enough for the trunk of a small car. The AquaDock rolls to about 3.5 ft x 15 x 15 in.
- **Chairs:** each deck also comes as a set with 2 POP Up Chairs that clip to the D-rings.
- **Cover:** 3-year warranty and a 60-day guarantee. Free shipping over $100 to the lower 48 and Canada.
