

Boat and Motor Fit Chart

Six Rover Marine boats, eight outboards, one page.

Every Rover Marine boat has a 15 in transom for a short-shaft outboard. Start with the max motor for your boat size, then pick gas or electric.

6
boats: 8, 10 and 12 ft

15 in
transom, short shaft

6 to 20 hp
max motor by size

8
motors to choose from

The six Rover Marine boats

Size	People	Capacity	Max motor	Packed size	Weight: Cat / Boat
8 ft	2	600 lb	6 hp	38 x 24 x 15 in	84 lb / 86 lb
10 ft	4	1,000 lb	10 hp	45 x 28 x 18 in	98 lb / 100 lb
12 ft	4	1,200 lb	20 hp	48 x 32 x 20 in	130 lb / 135 lb

Battle Cat is the twin-pontoon hull, Battle Boat the V-style tender. Both have a 10 PSI drop-stitch floor, 3 PSI tubes and a 15 in transom.

Which motor fits which boat

Motor	8 ft	10 ft	12 ft
Yamaha 2.5 HP	✓	✓	✓
Yamaha 4 HP	✓	✓	✓

Torqeedo Travel S	✓	✓	✓
Torqeedo Travel XP	✓	✓	✓

Yamaha gas outboards

Motor	Shaft	Good to know
2.5 HP	15 or 20 in	The lightest at 37 lb
4 HP	15 in	Built-in fuel tank, 60 lb
6 HP	15 in	60 lb
9.9 HP	15, 20 or 25 in	212 cc twin
15 HP	15 or 20 in	362 cc twin

Torqeedo electric outboards

Motor	Power	Motor weight
Travel XS	700 W, about 2 HP	11.6 kg, no battery
Travel S	1100 W, about 3 HP	11.6 kg, no battery
Travel XP	1600 W, about 5 HP	12.6 kg, no battery

Three checks before you order

1. **Read the boat rating.** Check the horsepower and motor-weight limits. Electric motors count too.
2. **Match the shaft.** Every Rover takes a short shaft: 15 in on a Yamaha, 62.5 cm on a Torqeedo.
3. **Plan the complete rig.** Count passengers, motor, fuel or battery and gear in the boat load.

Good to know

- Boats and motors are sold separately. Every boat comes with a manual pump, two aluminum paddles, bench seating and a repair kit.
- Motor sales are final. The motor maker handles warranty and service.
- This chart is a starting point, not a fit approval. Check your exact boat, motor weight, mounting and total load.
